## DOOR SCREENS

# Phantom Door Screens

One retractable door screen, custom-made to your opening - the cassette housing simply scales with the span. The mesh is retained in the side tracks, and the whole screen disappears into its housing when you are not using it.

### ONE SCREEN, THREE HOUSING SIZES

| Housing | System      | Typical use                          | Span                                                                                      |
|---------|-------------|--------------------------------------|-------------------------------------------------------------------------------------------|
| 45 mm   | MeshLock    | Front and back doors, single sliders | to ~1.3 m wide                                                                            |
| 60 mm   | MeshLock    | Wider sliders and stackers           | to ~2.0 m wide                                                                            |
| 80 mm   | Wall Screen | Bifolds, stackers, and wide openings | openings to ~9 m with standard insect mesh (~4.5 m per screen, two meeting in the middle) |

### WHY PEOPLE CHOOSE IT

- **Disappears when not in use** - the screen retracts into its cassette housing
- **Retained mesh** - held in the side tracks to resist blow-outs
- **One screen, three housings** - the system scales from a front door to a 9 m bifold
- **Colour-matched** - powder-coated to the Dulux range, Matt as standard
- **Retrofit or new build** - made to the millimetre for your opening

Wall Screens across a wide Tauranga opening - two screens meeting in the middle.

MeshLock on a ranch slider - Hoe-o-Tainui, Waikato.

# Specifications

|           |                                                                                                                     |
|-----------|---------------------------------------------------------------------------------------------------------------------|
| Heights   | MeshLock to ~2.5 m; Wall Screen to ~3.0 m                                                                           |
| Span note | Maximums are with standard insect mesh - heavier meshes (solar, pet) run to smaller spans, confirmed at the measure |
| Operation | Smooth retractable action; mesh retained in the side tracks to resist blow-outs                                     |
| Finish    | Powder-coated, colour-matched to the Dulux range - Matt as standard                                                 |
| Fit       | Retrofit or new build, made to the millimetre                                                                       |

## PROFILES

45 mm and 60 mm MeshLock housings with tracks (left); 80 mm Wall Screen housing, tracks, and recessed options (right). Dimensions in millimetres.

## MESH OPTIONS

- **Standard insect mesh** - 18x14 weave, ~58% open - what almost every home chooses.
- **Pet mesh** - PetScreen Lite vinyl-coated polyester (~45% open) - takes paws and claws.
- **Midge & no-see-um mesh** - finer 18x18 weave (~48% open) for coasts, estuaries, and bush.
- **Solar / privacy mesh** (80 mm Wall Screen spans) - E-Screen, 10% or 6% openness - cuts heat, glare, and UV.

## COLOUR

The 20 standard colours (indicative), Matt finish as standard - any other Dulux colour as a custom. Names and codes at [phantomscreens.co.nz/guides/colour-options](https://phantomscreens.co.nz/guides/colour-options); confirmed against physical samples at the measure-up.

Backed by our Limited Lifetime Warranty.

## Ready for an indicative price?

Enquire online with a couple of photos and rough sizes - you can upload the photos straight to the form. Usually no visit needed, and no obligation.
